XAC0234	Batten Retainer Kit	Clamp-on end to the bungee's	<ul style="list-style-type: none"> • A sleek design which fits nicely into the batten end. • Ergonomically designed for easily fitting and removal. • Adjustable tension, just loosen and retie the knot in the bungee. • Strong, it does not rely on stitching or clamping. 	21,00	
XBFP2256	Big Fork - Forged, complete	Front fork for rear wheel.	Replace your normal front-wheel for a rear wheel to conquer rough terrain. Some people use it as an performance item, because of the extra grip on tarmac.	259,00	
XDE0201	Deuce (two handed sailing)	Stainless Steel to connect 2 blokarts	With the deuce you can connect as many blokarts as you want, replace the keel voor the deuce and hook to the blokart in front of you, and off you go! You can even sail the second kart without a sail!	270,00	
XWH0201	Disc Brake Set	Disc brake for front wheel.	Stop!...You can now. The blokart disc brake has been developed to assist slowing and stopping. Ideal for when you are sharing a parkinglot with vehicles. Adjusters on either side of the caliper allow for easy tuning. The quick release brake lever also features a unique parking brake.	149,00	
BLO0200	Electric Motor	500 watt electric hub motor	The engineers at blokart have been working with an electric motor manufacturer to develop a hub motor for the blokart so they can be used promotionally in parades, events and demonstrations. The blokart front wheel was exchanged for an aluminium mag wheel of the same size fitted with a 500 watt electric hub motor. Pivots for a Vee Brake system were fitted to the purpose built forks. The left hand brake lever is fitted with a sensor which cuts the power to the front wheel to ensure the throttle is off under braking. A nice thumb throttle with a kill button and an LED battery power indicator is mounted on the right handlebar. The 36 volt battery is in a strong alloy case with an ignition key and is positioned in a purpose built bag behind the blokart seat with the systems controller in a small bag fitted to the side strut of the kart. The system is pleasantly powerful and instantly puts a smile on the driver face. It has so much torque that the front wheel easily spins at full throttle on the grass. Small inclines are not a problem. With only a small amount of friction in the front wheel when the throttle is off the electric system can certainly be used in combination with sailing. The e-blokart kit is excellent for "getting out of the hole™" on very light days. When coming to a stop, a short 5 second burst of power can excelebrate the kart to a speed that can be maintained with the sail using the apparent wind. The small amount of friction from the front wheel is a small sacrifice for this huge benefit.	NOT DEFINED

XFB0201	Foot Bar Extension	Stainless steel foot bar	This clever device allows those with long legs to fit comfortably in a blokart without being cramped. If you are 1,90+ this accessory is for you. Alternatively, a Pod also offers more leg-room along with other advantages- warmer, dryer faster!	89,00	
XFB0224	Footplate Complete (Long)	Aluminum / Polycarbonate plate	The blokart footplate provides a comfortable platform for your feet and takes the pressure of your legs. Designed to be used with or without a POD the footplate is shaped to fit inside the nose of the POD. It offers a wider surface for your feet and easily fits inside your POD. This footplate suits pilots over 177cm	255,00	
XFB0225	Footplate Complete (Short)	Aluminum / Polycarbonate plate	The blokart footplate provides a comfortable platform for your feet and takes the pressure of your legs. Designed to be used with or without a POD the footplate is shaped to fit inside the nose of the POD. It offers a wider surface for your feet and easily fits inside your POD. This footplate suits pilots from 155cm to 177cm	255,00	
XIS0001	Ice Skates (3rd generation)	Core 10 steel blades	Blokart ice skates first released in 2003 have gone through there most drastic review yet. The blades are now approx 17% to 23% longer with the front blade going 500mm to 600mm long and the rear blade going from 500mm to 660mm long. The ice clearance has increased from 40mm to 60mm giving 33% greater clearance from the ice.	1155,00	
XFB0111	Junior Foot Bar	Stainless steel footbar for small people	Offering sure footing for little humans, the junior foot bar is the perfect accessory for those of 1.20 and under to fit in the blokart.	79,00	
XMC0201	Mast Crane	Performance replacement for mast tip plug	A sealed bearing on your mast tip allows the sail to be fully downhauled and still tack smoothly. Use this b-Tech product for the performance edge.	79,00
